EXPERIENCE

Cybersecurity Projects | Rutgers University / Self-Study

January 2024 - Present, New Brunswick, NJ

- Conducted vulnerability assessment using Nessus, configured and scanned Metasploitable 2 to detect vulnerabilities and weaknesses. Researched, documented, and implemented mitigation strategies (system patching, disabling unused ports, and implementing firewall rules).
- Completed NIST DoD RMF course, increased understanding of Risk Management Framework Security Controls and their application to IA.
- Developed a Python script to scan system files for specific keywords and patterns using the os and regex libraries to generate a report of the findings.
- Setup Google Authenticator on Ubuntu server, enabling time-based authentication tokens and configuring SSH and PAM settings to require MFA.
- Configured Splunk solution on Ubuntu server, integrated system logs into data inputs, created search queries to track failed SSH login attempts, built a dashboard with a time chart panel, and simulated failed login attempts.

Satellite Communications Systems Manager | United States Air Force

February 2022 - February 2024, McGuire AFB, NJ

- Led 10-member team in maintaining 24/7 SATCOM data link supporting 120+ users, delivering 99.8% uptime for mission-critical systems essential to operational success.
- Deployed iDirect GATR 950/1050 TS modems, Cisco ISR routers, and KG-250X encryptors, establishing a secure, segmented network for classified communications.
- Designed on-the-spot redundant high-frequency (HF) communication to mitigate VoIP disruptions, ensuring uninterrupted reach-back for customers.
- Developed documentation, records, and troubleshooting guides for Harris PRC-117G/152A/150C radios, lowering diagnostic time by 25%, minimizing repeat issues and accelerating hardware setup.
- Enforced AES-256 and Type 1 encryption protocols, utilizing KVL 4000 and AN/PYQ-10 key loaders, ensuring compliance with DoD security protocols.

Radio Frequency Transmission Systems Supervisor | United States Air Force

March 2017 - February 2022, Aviano, Italy

- Led multi-agency emergency network project, configuring 391 APX6000/7500 radios to unify communication across 14 partners, reducing response times by 30% during crisis scenarios.
 - Diagnosed and resolved VSWR test failures, using signal generator and spectrum analyzer on 6 Mystic Star antennas, isolating faulty connectors and replacing damaged transmission lines to restore signal integrity for data links.
 - Restored 24/7 emergency alert functionality, repairing circuit overloads and replacing voltage regulator of mass notification system, brought node online within 30 minutes of reported outage.
-

EDUCATION & CERTIFICATIONS

Bachelor of Arts in Information Technology and Informatics | Rutgers University - New Brunswick

3.75 GPA, 2026

Associate of Applied Science in Electronic Systems Technology | Community College of the Air Force

Montgomery, Alabama, 2019

CompTIA Security+

Certification #: COMP001021538493, 2019

AWARDS

John L. Levitow Leadership Award (2021) | NCO of the Year (2023) | Airman of the Quarter (2019)
